

Problem Solving & Decision Making

This course offers an opportunity for delegates to improve and practise their problem solving and decision making techniques.

It teaches them, through case studies and practical exercises, how to use these techniques as pragmatically as possible

Who is it for?

Anyone who wishes to improve their decision making and problem solving skills

What do I get out of it?

- Techniques to analyse situations and problems logically
- Recognise different data gathering techniques for problem solving and decision making
- Tools to apply creative and lateral thinking to define objectives and solutions

Course Overview

- Problem identification and definition
- The value of differing perceptions
- Information handling for decision making
- Generating a range of solutions
- Decision making techniques

What's it about?

This course will provide delegates with techniques to assist them in the problem solving and decision making processes through a series of practical and interactive exercises
