Confined Spaces Training Solutions

Confined Spaces Training Solutions

Develop Training Ltd have been running Confined Spaces courses since 1975. Through our close working relationships with awarding bodies, Develop Training Ltd continues to contribute to the development of national and in-company standards.

People who have to work in Confined Spaces have to be competent to do so in order to comply with the Confined Spaces Regulations 1997. Understanding what constitutes a Confined Space and what risks it presents is essential as companies have a duty to ensure that their employees are suitably trained. Develop Training Ltd offers a range of City and Guilds accredited training and assessment programmes that will help give employers confidence that their employees have the skills and knowledge to work safely in Confined Spaces.

Each of our sites has a simulated Confined Space facility that provides an exceptional real life learning experience.

What is a Confined Space?

A Confined Space can be any place of an enclosed nature where there is a risk of death or serious injury from hazards such as lack of oxygen etc.

Some Confined Spaces are fairly easy to identify such as storage tanks, silos, reaction vessels, enclosed drains and sewers. Others may be less obvious, but can be equally as dangerous, for example open-topped chambers, vats, combustion chambers in furnaces, ductwork, unventilated or poorly ventilated rooms or trenches.

It is not possible to provide a comprehensive list of Confined Spaces. Some places may become classed as a Confined Space as a result of the nature of work being carried out, eg construction or fabrication.

■ Develop Training Ltd Certified	7
■ Develop Training Ltd - other areas of interest	8-9

Which course will I need?

Many of our clients are contractors required to provide proof of adequate training in Confined Spaces for a specific contract or client. Some will be meeting Confined Spaces environments for the first time and others want to take their staff to a higher level of Confined Space training and assessment. Regardless of your background, we have a training course to meet your Confined Space needs.

This suite of courses is designed for those who are required to work in Confined Spaces on water company premises in and around the UK mainland.

Develop Training provides representative experts on National Occupational Standards working group which has constructed the VRQ (Vocationally Related Qualifications) for the national Confined Space standard.

These courses will enable delegates to develop the essential, underpinning skills and knowledge required and to pass a competency based assessment. The assessment addresses planning, entering, working and exiting Confined Spaces including via a vertical shaft and where escape breathing apparatus is a part of the planned means of self-rescue.

The City & Guilds certification allows successful delegates to show proof of post-training competency to an employer or client which:

- is of direct benefit when tendering as a contractor
- demonstrates an investment in personnel
- provides an auditable trail when required

On the successful completion of any of these qualifications the delegate can register the qualification award with EU skills and this will then be recognised for a period of three years.

Course code & Title	City & Guilds Unit	Duration	Notes
WUK01 Working in Low Risk Confined Spaces	6150-01	2 days	
WUK02 Working in Medium Risk Confined Spaces (Open Circuit EBA)	6150-02	3 days	
WUK03 Working in Medium Risk Confined Spaces (Closed Circuit EBA)	6150-02	3 days	
WUK04 Working in High Risk Confined Spaces	6150-03	3 day	
WUK05 Overseeing Work in High Risk Confined Spaces	6150-04	2 days	This course is for individuals who will not be required to (and will not be allowed) to enter Confined Spaces

WUK10 Management and Supervision of Work at Confined Spaces.	6150-972	4 days	Does not allow entry upon completion of course
REFRESHER AND ASSESSMENT ONLY COURSES AVAILABLE ON REQUEST.			

Confined Spaces City & Guilds Certificated Training and Assessment courses

This suite of courses is designed to replicate confined spaces for those who are required to work on any commercial (non water company) premises in and around UK mainland.

Develop Training provides representative experts on National Occupational Standards working group which has constructed the VRQ (Vocationally Related Qualifications) for the national Confined Space standard.

These courses will enable delegates to develop the essential, underpinning skills and knowledge required and to pass a competency based assessment. The assessment addresses planning, entering, working and exiting Confined Spaces including via a vertical shaft and where escape breathing apparatus is a part of the planned means of self-rescue.

The City & Guilds certification allows successful delegates to show proof of post-training competency to an employer or client which:

- is of direct benefit when tendering as a contractor
- demonstrates an investment in personnel
- provides an auditable trail when required

On the successful completion of any of these qualifications the delegate can register the qualification award with EU skills and this will then be recognised for a period of three years.

Course code & Title	City & Guilds	Duration	Notes
CS6150-51 Working in Low Risk Confined Spaces (No Breathing Apparatus)	6150-51	1 ½ days	
CS6150-52 Working in Medium Risk Confined Spaces (Using Escape Set BA, Hood/Mask/Cylinder Type) (Open Circuit EBA)	6150-52	2 days	
CS6150-52CR Working in Medium Risk Confined Spaces (Using Escape Set BA, Chemical Re-breather Type)	6150-52CR	2 days	
CS6150-53 Working in High Risk Confined Spaces (Using Escape and Working Duration Set BA) (Closed Circuit EBA)	6150-53	3 days	
CS6150-54 Overseeing Work in High Risk Confined Spaces	6150-54	2 days	
CS6150-55 Emergency Rescue & Recovery of Casualties from Confined Spaces	6150-55	2 days	Delegates must have attained units 6150-53 prior to undertaking this course.
CS6150-56 Overseeing Work in Medium and Low Risk Confined Spaces	6150-56	2 days	
REFRESHER AND ASSESSMENT ONLY COURSES AVAILABLE ON REQUEST.			As the majority of the city and guild units are still very new the industry may request small changes from time to time therefore develop reserves the right to change course codes, titles and durations accordingly
Management units soon to be available. call us on 0800 876 6708 for more details			

Confined Spaces courses with Develop Training Ltd Certification

These courses provide an excellent foundation of awareness. In many cases these are useful for identifying the need for future training where required. This is a cost-effective suite of courses designed to cover the basics. Many companies who have bespoke requirements or who wish to incorporate their company policies into the Confined Spaces training use these courses.

Course code & Title	Duration
CS006 Confined Space Entry without Breathing Apparatus	1 day
CS003 Confined Space Entry with Escape Breathing Apparatus and Self Rescue Procedures	1 day
