

Health Estates

The technical complexity of hospitals means that their staff need to be trained to a high standard across a wide range of disciplines. To help meet these needs, Develop Training Ltd has put together a suite of courses for Health Estates training suitable for the NHS and other healthcare organisations.

Our Burn Hall Training Facility

We have many years of experience in providing Health Estates Training to over 200 NHS Trusts throughout the UK. All of our Health Estates courses are reviewed regularly and our range of courses are broadened on a yearly basis to supply you with the best Healthcare Training solutions in the market.

Those who maintain the vital (background) services in a hospital deliver high levels of service in accordance with strict regulation and guidance often using HTMs. All of our Health Estates Training events are run by experienced engineers and have been designed to enable the delegate to understand the requirements of the relevant Statutory Regulations and Technical Memoranda.

To see the full range of Health Estates courses offered by Develop Training Ltd please visit www.developtraining.co.uk/healthestates
